

Construction has a workflow gap

Your next technology decision should begin at the handoff.

Inspired by Revizto's 2026 research. Analysis and workflow illustrations by TrustStak.

A global view of the coordination problem

2,000

survey respondents

8

global markets

Technology integration remains the top business challenge, according to Revizto.

TrustStak perspective: examine how work moves between the tools you already use.

REPORTED FINDINGS / REVIZTO

Bridging the Gap: 2026 Digital Design & Construction Report

Coordination belongs in the budget conversation

#3

rework driver

Poor communication and coordination

Revizto reports that change orders lead the list of rework drivers.

A tool can store the information. A workflow must get it to the person who acts.

REPORTED FINDINGS / REVIZTO

Bridging the Gap: 2026 Digital Design & Construction Report

Extra work moves. Approval lags.

ILLUSTRATIVE SCENARIO / NOT A CASE STUDY

01

Unexpected condition

A field issue changes the scope.

02

Photos and messages

Evidence sits across separate threads.

03

Work proceeds

The office still needs cost and approval details.

Who owns the next action?

Make the next action visible

PROPOSED WORKFLOW / ADAPT TO YOUR CONTRACTS

01 **Capture**
Photos, scope and location

02 **Review**
Cost, schedule and completeness

03 **Approve**
Authorized decision, recorded

04 **Track**
Status, owner and billing follow-up

Assign an owner and a status at every step. Keep approvals with the authorized people.

Give AI a defined job

CAPTURE

Organize field notes and photos into a draft issue record.

CHECK

Flag missing scope, cost details or approval evidence.

ROUTE

Prepare the review packet and remind the assigned owner.

People verify the facts and authorize scope, spending and customer commitments.

Check whether the handoff improves

Establish a baseline, then compare the same workflow after a small pilot.

Elapsed time

Field issue to authorized decision

Completeness

Records with the required evidence

Open items

Pending changes awaiting an owner or action

Use your own project data. No savings or performance outcome is assumed here.

YOUR NEXT STEP

Find the leak in one workflow

TrustStak

AI Workflow Profit Leak Audit

Start with one recurring handoff that creates delays, missing information or repeated follow-up.
